

Just a note to let you know what a joy it is to have Julie Ornelas as my husband's physical therapist. As you know from your records, he has post-polio syndrome. Until Julie started working with him, his physical abilities kept going down hill.

Julie knows how to get him to improve and is a jewel in getting him to do his exercises. She has a terrific sense of humor and the "push" that it takes to do the job right. We love her and her attitude toward her patient. She is definitely devoted to getting her patient to the best of his abilities. We have nothing but praise for her.

Please excuse my typing this as I have essential tremor and typing is much easier for me than writing by hand.

A BIG THANK YOU for Julie.

Sincerely,

A handwritten signature in blue ink, appearing to read "Emma", is written over a rectangular grey redaction box.
